Education

Indian Institute of Information Technology, Una

2021 – Present

B.Tech. Computer Science and Engineering

Technical Skills

Language: C, C++, Python, R

Frameworks: Flask, FastAPI, Streamlit, Gradio, Django, DRF, GraphQL, Celery, pytest

Databases: MongoDB, Cassandra, Redis, SQL, PostgreSQL, Qdrant, ChromaDB, Weaviate

DevOps: Docker, Kubernetes, Git

Data Engineering: Snowflake, Apache Kafka, Databricks, AWS Glue, PySpark, DBT, Airbyte, Airflow, MetaBase

Experience

ZS Associates

January 2025 – Present

BTSA (Business Technology Solutions Associate) - Intern

Pune, Maharashtra

- Enhancing the backend and data pipelines of a Drug Resource Planning platform for pharmaceutical companies, optimizing resource management.

VarsityPro

July 2024 – December 2024

Backend Engineering Intern

Delhi (Remote)

- Developed the backend for 4+ platforms, including a Career Accelerator, Alumni Network, Placement Cell & Campus Recruiter Connection, and Coworking Space Management, using Django REST Framework (DRF).
- Implemented Django Celery to efficiently execute tasks like code evaluation for a coding platform and AI-driven resume scoring and interview preparation.

ZS Associates

February 2024 – June 2024

BTSA (Business Technology Solutions Associate) - Intern

Pune, Maharashtra

- Contributed to the development of a data processing pipeline leveraging Generative AI to streamline data management for pharmaceutical companies.
- Played a key role in designing a data crawler that integrated data from 4+ sources, including Databricks, S3, Snowflake, and Redshift, improving the efficiency of the ingestion process.
- Re-architected the project from MVP to business-ready state, ensuring scalability and usability.
- Contributed to ZS's multi-layered Data Warehousing pipeline (ingestion, acquisition, and warehousing), upgraded Airflow DAGs to the latest version, and integrated Generative AI solutions for DQM checks in the ingestion layer.

Projects

Galaxy Search

December 2024

Elasticsearch, FastAPI, Streamlit, Docker, Python

[Github](#)

- Developed Galaxy Search, a search engine for astronomy images, utilizing Elasticsearch for 40% faster data retrieval, FastAPI for the backend, and Streamlit for an interactive frontend.
- It allows seamless document insertion and search functionality. Elasticsearch is containerized using Docker.

Scheduled Product Scraper

October 2024

Django, DRF, Django Celery, Selenium, BeautifulSoup, Docker, Redis, Flower, Prometheus

[Github](#)

- Developed a web scraper using Python, Selenium, and Django to automate product scraping at scheduled intervals, parsing data with BeautifulSoup and storing it in a Django database for ongoing analysis.
- Integrated Celery for asynchronous task scheduling, increasing scraping efficiency by 30%. Leveraged Redis for task queue management, ensuring smooth execution and enabling the scraper to adapt dynamically to changing website structures.

TaskManager

October 2023

Django, DRF, Unit-testing, JWT

[Github](#)

- Developed a secure and documented Django Advanced API for task management, featuring user authentication and authorization, role-based access control, CRUD operations on tasks, and robust input validation.
- Enhanced user experience with filtering, sorting, pagination, and search functionality for tasks while ensuring proper security measures such as CSRF protection and JWT-based authentication.
- Implemented comprehensive testing, including unit tests, integration tests, and rate limiting to safeguard the API and prevent abuse.
